The Journal of Clinical Investigation, Volume 90, No. 6, December 1992.

Page 2305.

The following pertains to the first paragraph of Methods:

The ER₄ antibody originated from the laboratory of Dr. Jan Rozing (Erasmus University, Rotterdam, The Netherlands) and was generously provided to us by Dr. W. W. Bakker: Immunopathology Research Section, University of Groningen, The Netherlands, where it was produced either from hybridoma supernatants or from mouse ascites fluid.
