

Ruggeri, Z.M.

*The Journal of Clinical Investigation*. Volume 99, No. 4, February 1997.

Page 559. (Column two, second full paragraph.)

The glycoprotein is synthesized in endothelial cells and megakaryocytes as a precursor polypeptide of 2813 amino acids (pre-pro-vWF), including the 12-residue signal peptide, the 751-residue propeptide and the 2050-residue mature subunit.

The previous sentence should have read:

The glycoprotein is synthesized in endothelial cells and megakaryocytes as a precursor polypeptide of 2813 amino acids (pre-pro-vWF), including the 22-residue signal peptide, the 741-residue propeptide and the 2050-residue mature subunit.
