

Full unedited blot for Figure 4B

Molecular weight marker, colorimetric image; labeled lanes, chemiluminescent image. All lanes on the blot correspond with the cropped lanes and images shown in Figure 4B.

## Full unedited blot for Figure 4C

Molecular weight marker, colorimetric image; labeled lanes, chemiluminescent image.  
All lanes on the blot correspond with the cropped lanes and images shown in Figure 4C.

Full unedited blot for Figure 4E

Molecular weight marker, colorimetric image; labeled lanes, chemiluminescent image.  
All lanes on the blot correspond with the cropped lanes and images shown in Figure 4E.

Full unedited blot for Figure 5A

Molecular weight marker, colorimetric image; labeled lanes, chemiluminescent image.  
All lanes on the blot correspond with the cropped lanes and images shown in Figure 5A.

Full unedited blot for Figure 5B

Molecular weight marker, colorimetric image; labeled lanes, chemiluminescent image.  
All lanes on the blot correspond with the cropped lanes and images shown in Figure 5B.

Full unedited blot for Figure 5E

Pull-down assays using recombinant GST-tagged GIV N- or C-term fragments or GST alone  
48 hrs transfection with CX43\_GFP Plasmid. (Transfection done in Cos 7 cells.)

Full unedited blot for Figure 5E

Molecular weight marker, colorimetric image; labeled lanes, chemiluminescent image.  
All lanes on the blot correspond with the cropped lanes and images shown in Figure 5E.

Full unedited blot for Supplemental Figure 5

Molecular weight marker, colorimetric image; labeled lanes, chemiluminescent image.  
All lanes on the blot correspond with the cropped lanes and images shown in Supplemental Figure 5.

Full unedited blot for Supplemental Figure 6

Empty lanes with small overflow from adjacent lanes

Blot presented in Supplemental Figure 6 for GIV is the full unedited version (reproduced here for comparison with the edited actin blot shown below).

Full unedited blot for Supplemental Figure 7
