

## Uncropped/unedited gel image (Figure 3C)

This is an unedited image of the gel used for Figure 3C. The dotted line indicates the cropped area used for Figure 3C. This is a PKA substrate blot, with a phospho-PKA substrate primary antibody (Cell Signaling, 9624, Rabbit mAb) and an anti-rabbit secondary (Cell Signaling, 7074). Images were developed with ECL substrate (Bio-Rad) and imaged in a ChemiDoc imager (Bio-Rad).
