Supplementary Fig. 1

Supplementary Figure 1: Induction of CXCL9 is IFN-γ-dependent.

Huh-7 cells (A, B) or primary human hepatocytes (C, D) were treated with 3 ng/ml IFN- α -con1, IFN- β , or IFN- γ for 24 hours. Secreted CXCL9 was quantified by ELISA (A, C) and CXCL9 mRNA levels were quantified by real-time PCR (B, D). CXCL9 was induced by IFN- γ , but not by type I IFN.
